

Wonderful letters  
from 6<sup>th</sup> Graders  
about the 15.

10/23/08

Dear Mr. Ruben,

Thank you for coming to our class. I think that the Golfer's 15 will help many of my friends at the First Tee of Moshulu Golf Course.

Golf is my favorite sport. The problem is that when I tee up or make a divot, I have to run to my bag and get the tools. I have about a million pockets so when I look for a repair tool, I get a tee by mistake. The Golfer's 15 will make golf so much easier. The ScotchBrite was a great addition too. My clubs can get very dirty. Thanks again!

Sincerely,  
William Roberts

Dear Mr. Ruben,

Thank you so much for coming in to talk about the invention process. I found it very interesting. I liked how you named the golfer's 15, the golfer's 15 because it is such an original name. I also like it because was a brilliant idea. I play golf, and it is very frustrating to dig into your pockets to find the correct tool. I also liked the idea of the evo pen. It is a great invention, even better for people with arthritis. Thank you for coming.

Dear Mrs. Rubin

I loved your lecture on the Golfers 15 the Evo-pen and all of your other inventions. My favorite part of the Golfers 15 was that material you used that cleans the ball. It was my favorite part because it cleans out the dimples and that's good because the dimples make the ball go farther. I also like the Evo-pen. It does fit the natural grip of your hand. I thought that that was genius. Can I please have two?

Dear Mr. Rubin, "G"

I think your inventions are great. The Evo Pen is a great invention because it fits naturally in your hand. Your inventions are very amazing. The Golfer's 15 is really cool. It has almost everything you need to play golf. I really like your inventions.

Sincerely,  
Sophia Rogers
